Pintel Deluxe

Introducing the Vogue Pintel Deluxe, winner of the "Australian Design Award", an innovative clean burning wood heater designed for homes of the 21st century and beyond. The Pintel combines all the features of prestige and excellence you would expect in a classic wood heater.

The advanced design of this fully fire brick lined, rugged steel heater allows you to burn wood with radically reduced emission output, while maximising heat yield. Burning wood is natural, clean and reduces our reliance on dirty coal powered alternatives.

All Vogue wood heaters are tested to the rigorous Australian Standard AS/NZ 4013. This standard requires heaters meet stringent efficiency and emission levels.
